Quality Solution for Fiberglass Requirement

Largest & Most Reliable Supplier
of all Kinds of FRP Raw Materials and Accessories.

Quick services, superior quality product and consistent supply at competitive price is our Moto.

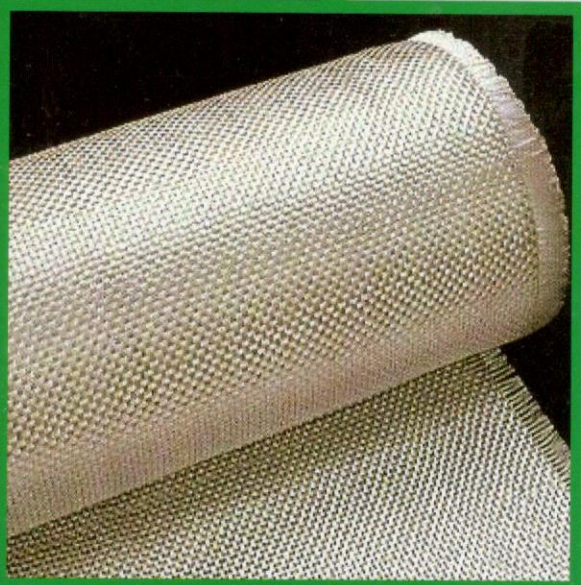

FIBERGLASS CHOPPED STRAND MAT

Emulsion & Powder (Imported + Domestic)

100gm, 150gm, 180gm, 225gm,
300gm, 450gm, 600gm, 900gm

CSM, is a kind of Reinforcing product that made from continuous fiberglass strand bonded with Powder Binder or Emulsion Binder. CSM is mainly used for hand lay-up applications and continuous lamination process widely applied for Cooling Tower, Yacht, Auto, chemical tank, anti-corrosion pipe etc.

GLASS FIBER WOVEN FABRIC

"C" & "E" Glass

200gm, 400gm, 600gm

Woven Fabric is a fabric made by interweaving rovings. It is compatible with many resins, such as Polyester, Vinyl Ester and Epoxy resin. Widely used in hand lay-up and moulding products such as yacht, plane, FRP tank, automotive parts, furniture and other fields. It is available in C & E Glass.

E GLASSFIBER DIRECT ROVINGS

Filament Windings / Pultrusion etc

300Tex, 600Tex, 1200Tex, 2400Tex, 4800Tex

Direct Rovings are produced by winding a certain number of individual fibers directly from the busing without twist into rovings. It is compatible with polyester, vinyl ester and epoxy resins. Direct rovings are specially designed as reinforcement for FRP pipes, pressure vessels, gratings, and when converted into woven rovings, for boats and chemical storage Tanks etc.

CHOPPED STRAND

THERMOPLASTICS

3mm, 6mm

E Glass Chopped Strands are in the line chopped. It is used for making Gift Articles. It's suitable for reinforcing thermoplastics to produce molded parts of electrical, mechanical and chemical resistant applications in transportation and construction industries etc.

FIBERGLASS COMBINATION MAT

600gm, 900gm

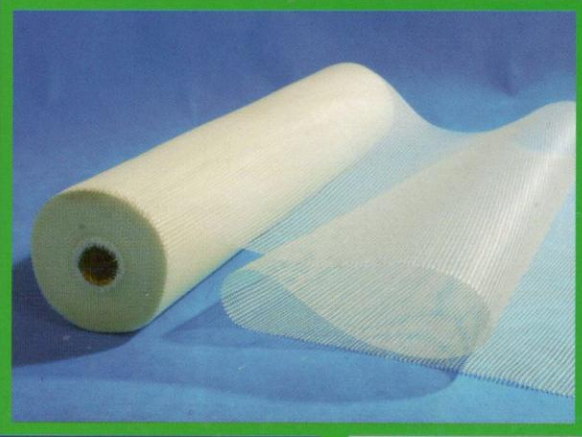

It is combination mat that use polyester thread to stitch with woven roving and distributed chopped strand. It is raw material for FRP Sheet and yacht etc.

STITCHED MAT

450gm

Stitched Mat is a fabric by spreading the roving of certain length and stitching by polyester thread together. It is widely used in Flat panel, winding pipe, pultrusion pipe, pultrusion products, yacht etc.

FIBERGLASS MESH

40gsm, 75gsm, 145gsm

It is made by Fiberglass yarn and coated with chemical latex. It has good Alkali resistant property and good mechanical durability. It is used in exterior insulation finishing system, Roofing system, Marble, etc.

FIBERGLASS EPOXY CLOTH (7 MILL)

Small Roll : 40kg & Jumbo Roll : 680 - 700 kg

E Glassfiber Woven Fabric 7628, i.e. 7 Mill cloth is plain weaved on air-jet looms by intersecting wrap and weft. Its properties are High strength, heat resistance, Fire retardant and insulation, easy for resin impregnation, treated with silane coupling agent and excellent compatibility with resins.

SURFACE MAT

"A" Grade Imported : 300 m² Roll

Surface Mat is mainly used in the surface layers of FRP products. It is capable of significantly improving the strength of FRP surface layer, strong impaction resistance, excellent uniformity of surface, good covering up the texture of under layers, and good corrosion resistance.

MARBLE POWDER (ATH)

Marble Powder is widely used material due to its versatility and low cost. ATH Imported by us is of the quality mainly used in making sculptures, gift articles etc.

UNSATURATED POLYESTER RESIN

General Purpose Base Resin

- 1) General Purpose Resin (GP)
- 2) Low Viscosity Resin (GPLV)
- 3) Ultra Violet Resin (GPUV)
- 4) Rooflite Resin (RL)
- 5) Gelcoat Resin (GPGC)
- 6) Fire Retardant resin (GPFR)

Isophthalic Base Resin

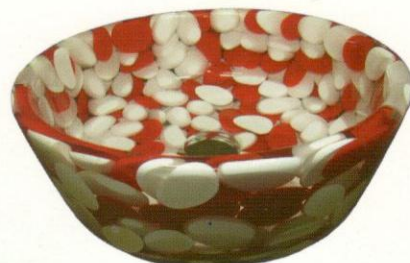

- 1) Isophthalic Mechanical Resin (ISO-TPA)
- 2) Isophthalic Chemical Resin (ISO)
- 3) Isophthalic Gelcoat Resin (ISOGC)
- 4) Isophthalic NPG Gelcoat Resin
- 5) Isophthalic Fire Retardant Resin (ISO-FR)

Vinyl Ester Resin

- 1) General Purpose Vinylester Resin (VE)
- 2) Superior Vinylester Resin (SUP-VE)
- 3) Bisphenol Resin

Special Clearcast Resin

Marble Effect & Clear, Transparent Articles

ACCESSORIES

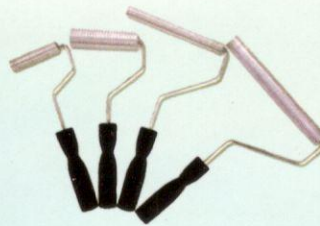

- ◆ COBALT OCTATE - (3%, 6%, 12%)
- ◆ COLOURLESS COBALT
- ◆ HARDNER FOR POLYESTER RESIN
- ◆ ACETONE
- ◆ STYRENE
- ◆ WAX SOLUTION (4-5 SOLUTION)
- ◆ GARWARE MYLAR FILM (25 Micron to 175 Micron)
- ◆ SILICA POWDER
- ◆ SOFT STONE POWDER
- ◆ AEROSIL POWDER
- ◆ CALCIUM CARBONATE POWDER
- ◆ PVA POWDER

AND MANY MORE ACCESSORIES

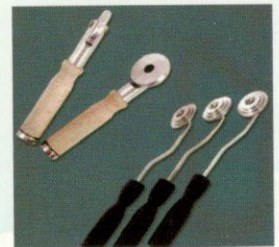

PIGMENT

ALLUMINUM ROLLER

RADIUS ROLLER

WAX POL

MANSION POLISH

BRUSH

MUKTI WAX

PVA SOLUTION

Dow Corning
Rubber solution for Moulding
